SENIOR SOFTWARE ENGINEERING LEADER | E-COMMERCE PLATFORM SCALE | MICROSERVICES & CLOUD MODERNIZATION

Software engineering executive with 15+ years of experience leading large-scale, customer-facing engineering organizations — including direct leadership of Walmart.com's shopping platform reliability and release engineering. Proven track record building high-availability microservices, breaking down legacy monoliths, scaling AWS cloud infrastructure, and mentoring engineering managers through Agile-driven modernization. Deep experience embedding AI/automation into the engineering lifecycle to accelerate delivery velocity and quality — directly aligned with Capital One's innovation-first engineering culture.

CORE QUALIFICATIONS

- E-commerce Platform Leadership: Led release engineering and reliability for Walmart.com — a high-volume shopping platform serving 25M+ customers daily — directly translatable to Capital One Shopping's mission-critical customer experience.
 - Microservices & Monolith Decomposition: Rebuilt legacy Java integrations as Spring Boot REST microservices on AWS ECS, replacing monolithic EC2 deployment patterns with scalable, supportable architecture.
 - People Management at Scale: Led global team of 20+ engineering managers and software engineers, with prior people-leadership experience as Senior Manager, Mobile (Sears Holdings) — exceeding the 7+ years management bar for this role.
 - AI-Driven Engineering Velocity: Deployed AI for PR reviews, flaky-test analysis, and incident diagnosis, reducing review cycles 25% — directly relevant to Capital One's aggressive AI-tooling adoption (Claude Code, Windsurf, agentic tooling).
 - Full-Stack, Multi-Platform Craftsmanship: Delivered iOS, Android, and cloud-native services across Java, REST APIs, CI/CD, and AWS — spanning the full-stack breadth this role requires.
-

PROFESSIONAL EXPERIENCE

Walmart | Head of Release & Reliability Engineering

Dallas, TX | JAN 2021 – Present

Own release engineering, developer productivity, CI/CD reliability, and release governance for Walmart.com. Lead global team of 20+ engineering managers and software engineers, partnering with senior technology and product leaders on platform investment and delivery strategy.

- Enterprise Release Acceleration: Restructured release governance and deployment automation across eCommerce and platform teams, moving Walmart.com from weekly to daily delivery — directly parallel to accelerating Capital One Shopping's feature velocity.
- Microservice & Monolith Transformation: Directed platform teams breaking down legacy applications into resilient, scalable microservice architectures on AWS.
- Developer Platform at Scale: Built one-click deployment platform for 1,000+ Web, iOS, and Android engineers, generating ~\$25M in annual savings.
- AI-Driven Engineering Analytics: Built AI-driven analytics across 44 repositories identifying review-wait as the largest bottleneck (67 hrs / 44% of PR cycle); deployed agentic AI for PR review and code remediation, reducing cycles 25%.
- AI-Driven Incident Recovery: Built AI monitoring correlating diagnostics and recommending fixes for Walmart.com's customer-facing systems.
- CI Reliability & Throughput: Managed 241 active CI workflows; engineered cloud orchestration reducing iOS build/test pipeline to one hour.

Kforce | Advanced Software Engineer**Portland, OR | JUN 2020 – JAN 2021**

- Microservice Modernization: Rebuilt legacy Java integrations as Spring Boot REST services on AWS ECS, replacing EC2 deployment patterns with a scalable operating model.
- Infrastructure Consistency: Codified Terraform and Jenkins deployment patterns for AWS services, reducing configuration drift across production integrations.
- Cross-System Leadership: Led 5+ engineers through interface discovery and delivery sequencing for a Fortune 100 supply chain modernization program.

Cvent | Senior Software Engineer**Portland, OR | NOV 2018 – MAY 2020**

- Multi-Platform Modernization: Migrated iOS (Objective-C→Swift) and Android (Java→Kotlin) for a configurable enterprise event platform.
- Secure CI/CD Automation: Rebuilt mobile CI/CD with embedded automated security gates for every production build.

Nike | Lead Application Engineer**Portland, OR | FEB 2013 – NOV 2018**

- Mobile Release Automation at Scale: Built automated signing/validation/distribution workflows supporting 100+ internal mobile apps.
- Cloud Legacy Migration: Migrated 100+ legacy Java applications to AWS, reducing operational risk across supply chain data flows.

Additional Experience:

Sears Holdings Corp (Aiva Consulting LLC) | Senior Manager Mobile

Vostu Inc | Mobile App Developer

The Wall Street Journal (Vensi Inc) | Software Engineer Android Consultant

The University of Alabama | LAMP Developer

IDS Technologies | Software Engineer

EDUCATION & CERTIFICATIONS

Master of Science (MS), Computer Science

Bachelor of Science (BS), Electrical Engineering

The University of Alabama

Jawaharlal Nehru Technological University

SKILLS

Software Engineering Management · Cross-Functional Team Leadership · Microservices Architecture · REST APIs · Java · AWS/Cloud Infrastructure · CI/CD · Release Engineering · Agile Methodologies · Developer Productivity · Root Cause Analysis · Platform Engineering · Security & Compliance
